

AETHER UV SYSTEM

Water Sterilizer

Reduces and Controls:

- Scale • Bacteria • Chloramines • Chlorine
- Odor • Taste • Dissolved Solids • Rust
- Lead

AETHER UV System is an effective method to provide bacteria free sterilized water for your equipment. Ultraviolet sterilizer kills bacteria, is safe to use, reliable and chemical free. UV treatment does not change the taste, odor, pH, or the general chemistry of water. Simple and easy to maintain with only a periodic cleaning of sleeve and annual lamp replacement.

The UV System comes with Aether proprietary filter cartridges that can be made with our patented media to control, Scale, Chlorine, Taste, Odor, Chloramines, Sediments, Biofilm, Bacteria and other contaminants.

Bacillus

Cyanobacteria

E. Coli

Cryptosporidium
